Dear Mr. Snow

I am writing to urge you to not raise existing dams or build new offstream reservoirs as called for in the revised CALFED plan

Wild rivers are fast becoming a thing of the past. As I sit here on the banks of the American River, I wonder how we can continue with this dinosaur mentality of building more dams. Follow Babbit's lead and start taking dams apart, not building more.

Other options for water needs exist: water efficiency, conservation and reclamation programs, switching to crops that need less water, installing water meters for all users

Please take a leadership role and continue to plan to remove dams like Englebright.

I look forward to a response from you in writing. Please no form letters.

Thanks.
