Lester Snow
Exect director Cal Fed
1416 Ninth Street
Sacramento, CA 95814

Dear Mr. Snow,

It is my feeling that growing crops like rice, alfalfa, & cotton is not appropriate in a state that has a climate like California.

Cal Fed's plan to increase surface water storage with new water projects would hurt the water eco systems.

Please re consider your plan so that what is left of nature has a chance to survive
