8/14/99

Lester Snow
Executive Director, CALFED
1416 Ninth St.
Sacramento, CA 95814

Dear Mr. Snow:

Please consider this letter a response to the revised CALFED plan.

I oppose the plan to increase surface water storage by raising existing dams or building new offstream storage reservoirs. I urge CALFED instead to expand water efficiency, conservation, and reclamation programs to stretch our existing water supplies. I support the proposed restoration goals for Central Valley. Thank You for your time & consideration.

Sincerely,
[illegible]
