Dear Mr. Snow:

Please consider this letter a response to the revised CALFED plan. I am extremely concerned with the state of California's water supply. The fact that we don't even have a whole heck of a lot is one thing. Even more so, though, is the fact that there are folks out there who believe that building more dams and diversions will actually help this problem! I urge CALFED to expand water efficiency, conservation and reclamation programs to stretch the existing water supplies instead of building new dams & canals.

Thanks for your consideration & support.

Sincerely,
Nishawn Ayala
