Dear Mr. Snow, 0028

July 18, 1999

Please adopt a CalFed plan that:

1) Maximizes water efficiency and conservation;
2) Removes barrier dams, increases instream flows, and acquires and restores habitat for fish and wildlife.
3) Does not rely on proposed dam raises or new offstream storage reservoirs.

We strongly reject the false promise that eco-system restoration must go hand in hand with building new dams!

Sincerely,

JUL 2 1 1999

Mr & Mrs J Denson
