Dear People at Cal Fed 0048

Please reevaluate your water proposal with an eye to strong environmental practices. Since your proposal is for the long term, it would seem sensible to look at the long term effect on the environment. We have so little opportunity to prevent long lasting or even permanent damage and once the damage is done it becomes so hard to undo. Please take the time NOW to make sure things are done right.

Thank you,

Marianna M. Rivinus
