Subject: CALFED Plan

Dear Director Snow,

I am taking the time to write this letter to you because I want you to know that I am greatly opposed to the current CALFED Plan.

The CALFED plan needs to be revised to provide for better conservation efforts and better management of groundwater and watersheds, and pollution prevention. In particular I urge you to ensure that it be modified to include the following provisions:

- NO NEW OR EXPANDED DAMS
- Invest more into water conservation and improvement of water quality
- RESTORE OUR RIVERS AND BAYS with firm guarantees of more fresh water flows and care for land around the waterways

I am a well-educated engineer who, frankly, has little concern for your or any other politician's sexual preference, marital relationship, or religious affiliation. I do however, have great concern for how our government leaders support environmental issues. I hold the preservation of the natural world close to my heart and it is one of the strongest factors in how I vote. The opinion that I have voiced in this letter is not uncommon. It is the voice of many people just like me.

Respectfully,

Jeanne Pimentel
