Date 9/18/99

Dear Executive Director Snow—

I have some concerns that I request you record formally for your Draft Programmatic Environmental Impact Report and Statement. It is imperative that the CALFED Bay/Delta program be revised in several ways. First, the program must commit to not building any new or expanded dams, reservoirs or canals during CALFED'S "Stage I". Second, the program must increase investments in water conservation and efficiency, groundwater management, and drinking water treatment. Third, the program must improve water quality for people and wildlife by preventing pollution at the source. Also, the program must restore our rivers, bays and fisheries by providing firm guarantees of more fresh water flows and by caring for the land around our rivers. Finally, the program must not make taxpayers subsidize new or expanded dams, reservoirs or canals.

Thank you for your time and the inclusion of these necessary revisions,

Nicole Beeck
