AUG 19 1999 0198

Dear Mr. Snow 8/14/99

In response to the revised CALFED plan I would like to encourage you to focus on water conservation rather than damming up the rivers, or increasing the size of the existing dams. A much more reasonable solution for the long term would be to start holding citizens and agribusiness accountable for the amount of water they use. Stop subsidizing water use for agribusiness until they take responsible conservation steps. Dams do not control floods. We can't solve problems caused by dams and diversions by building more.

Sincerely,
Mandy Ruiz
