0205

Dear Mr. Snow,

AUG 19 1999

After learning about your plan to raise dams and build even more reservoirs, I am compelled to write this letter stating my disagreement. This would require too much diversion from the sacramento river. It is unacceptable to me that you would do this to our natural resources.

There are many alternatives to these actions. Conservation and efficiency programs need to be created which will equalize the need for more water. Many of your plans are in fact going to help, including your planned removal of some of your facilities but it simply isn't enough.

~~Thany~~

Thank you,

Robert Yjulc
