Lester Snow
Executive Director Cal Fed
1416 Ninth Street
Sacramento CA 95814

Dear Mr Snow,

In regards to the revised Calfed plan, I do not support the current plan to increase water storage in the Central Valley by raising existing dams or building new offstream storage areas. I also oppose raising Shasta Dam since this would raise water on flood sequents of the McCloud & Sacramento rivers.

I strongly suggest to provide incentives economic & otherwise, to those farmers & large water users, who find ways to conserve and/or reclaim water. This could be a pivoting part of the Calfed Plan.

I strongly support Calfed's Plan for restoration goals for the Central Valley, including removing structures & facilities that impede migrating salmon & restoring riparian habitats, and increasing water flows in streams

to support wildlife & natural habitats.

Sincerely,

Dave Johnston Ph.D.
