Dear Mr. Snow,

I strongly oppose the building of new dams and the raising of existing dams in California.

It is not beneficial to wildlife, nature or outdoor enthusiasts to construct these dams.

As the population increases and people live more decadent lifestyles water conservation by individuals, businesses and farmers is crucial. It is time to do to protect Mother Nature; we have been reaping

for gifts thankfully
and irresponsibly
for too long.

Please reply. I look
forward to hearing from you.
Thank you.
