Lester Snow
Exec. Dir. Cal Fed

AUG 19 1999

Mr Snow:

I am opposed to raising existing dam heights or expanding storage reservoirs (i.e. Shasta Dam) which may flood upper Sac & McCloud rivers.

Rather than building new facilities, conservation would be both cheaper & more effective. Agribusiness could also plant less water intensive crops, cutting down their water needs.

I don't believe we can solve Calif's water problems, caused by too many dams

& diversions, by building yet more dams & diversions.

Thank you for your consideration
