Dear MR. Snow:

I am here on the South fork river. Its beauty ~~[illegible]~~ and splendor has inspired me to write this.

Pls consider this letter a response to the revised CALFED plan.

I oppose CALFEDS plan to increase surface H_2O storage in the central valley by raising existing dams or building new upstream storage reservoirs. CALFEDS plan to raise Shasta dam would flood segments of the upper Sac. & McCloud rivers. CALFEDS proposed sites upstream storage reservoirs would require massive H_2O diversions from the Sac. river.

I urge CALFED to expand H_2O efficiency conservation, & reclamation programs to stretch our existing H_2O supplies, instead of ~~[illegible]~~ building new dams & canals.

~~Pa~~ I support CALFEDS proposed restoration goals for the Central

valley, including removing some facilities such as the Eagle bridge dam, that acts as a barrier to migrating salmon, acquiring ~~important~~ important riparian habitat, & increasing instream flows for fish, wildlife, & recreation.

I am a voter.
Thank you for your time,

Ashley Hooker
