Dear Mr. Knox,

I am pleased to write a response to the Calfed Plan to increase Water Storage by raising existing dams or building new ones. I am opposed to the raising of Shasta Dam due to possible flooding of parts of the upper Sacramento & McCloud Rivers.

Please consider expanding water efficiency, conservation & recreation programs to stretch existing water supplies instead of new dams & canals.

I support Calfed's proposal for restoration in the Central Valley, including removing dam facilities as the Engelbright Dam that are barriers to the salmon.

Sincerely,
Pam [illegible]
