Lester Snow
Executive Director, CALFED
1416 Ninth Street
Sacramento, CA 95814

Dr. Mr. Snow;

I am very disturbed by the revised CALFED plan that calls for raising existing dams or building offstream storage reservoirs.

CALFED has an opportunity call for increased conservation, expand water efficiency, and lead the way in forging an environmentally sound water policy that won't destroy segments of the Upper Sacramento & McCloud Rivers

I do support the proposed restoration goals for the Central Valley, which include removal of some facilities such as the Englebright dam. Removal of such man made barriers will once again

allow for salmon runs, increasing upstream flows for all fish, improved recreation and improved habitats for wildlife

We can not solve the ecological problems caused by dams by building more dams. Nor will building more dams increase the desire & true need to educate the public to true water conservation

Sincerely,

Steve Yaver
