15 Aug 99

Mr. Lester Snow
Executive Director, CALFED
1416 Ninth St.
Sacramento, CA 95814

Dear Mr. Snow:

When reviewing the revised CALFED plan, please consider not approving raising of Friant Dam. The salmon fisheries of the San Joaquin have been nearly wiped out, yet there is a chance for future restoration. Raising the Friant Dam will not help such restoration efforts. Water conservation by ~~both~~ agricultural, urban users and industry can meet Calif's water demands and insure continued economic growth without further diversion of base flows. Thank you

Sincerely

Cindy Roessler
