The illustration used for this card is an original reproduction of a Victorian Advertising trade card published between 1860 and 1920.

8/22/99

Sir: Please consider a plan that:

Maximizes water efficiency & conservation & bases future water needs on realistic assumptions rather than inflated demands

Removes barrier dams, increases instream flows & acquires & restores habitat for fish & wild life

Does not rely on proposed dam raises or new offstream storage reservoirs

IMPROVES water quality by ENFORCING Pollution limits

Water is life source and when we make choices we must consider our children's children

Thank you. Gracias (Recently)
