SEP 0 2 1999

Mr. Snow,

Please consider this letter a reponse to the revised CALFED plan.

I oppose CALFED's plan to increase surface water storage in the Central Valley by raising existing dams. CALFED should expand conservation & reclamation programs to stretch our existing water supplies.

I support CALFED's proposed restoration goals for the Central Valley, including removing some facilities such as Englebright. We cannot solve the ecological problems of dams by building more dams.

Thank you for your consideration

Sincerely

Janine Heath, 275 Viking Lane,
Marina, CA 93935
