SEP 0 2 1999

To: Dear Mr. Snow: Director Cal Fed
From: Ronald Lee: Concerned Citizen

Please consider this letter a response to the revised CALFED plan.

I oppose CALFED's plan to increase surface water storage in the central valley by raising existing dams and building new offstream storage reservoirs.

I urge CALFED to expand water efficiency, conservation, and reclamations programs to stretch our existing water supplies.

I support CALFED's proposal restoration goals for the Central Valley.

I believe history points to the fact that attempting to expand reservoirs, instead of increasing conservation & planning, will only destroy habitats such as in the Owens river valley and

0404 (2)

Mono lake in the earlier part of this century.

We cannot solve the ecological ~~[illegible]~~ problems caused by dams and diversions, by building more dams and diversions.

Sincerely,

Ronald Lee
