Mr Snow,

SEP 1 0 1999 703

My husband and I are concerned about your CALFED Bay Delta Program.

We urge you to adopt a plan that would maximize water efficiency and conservation of our existing water supplies, before creating new ones.

Please remove barrier dams, increase instream flows, as well as acquire and restore habitat for fish and wildlife.

Your plan, further, should not rely on proposed dam raises or new offstream storage reservoirs. Please consider the impact these massive diversions will have on the Sacramento River and Delta. Thank you for your time.
