You need to do all in your power to help restore the Bay / Delta water flow and watersheds. What makes the area terrific is largely the environment & ecology, & preserving it against the predators of development & wasteful farm use is a tough job. We hope you can say NO! to any dams & reservoirs and canals in the first 7yr stage, and work for specific steps for increased water quality & volume, and the natural habitats. Please try, with a new to succeed.

Thanks. George & Judy Riley
