Jeanne P. Lemkuil

9/7/99

Dear Mr Breitenbach,

I am writing to urge CALFED to adopt a plan that:

- Maximizes water efficiency & conservation & bases future water needs on realistic assumptions rather than inflated demands
- Removes barrier dams, increases instream flows & acquires & restores habitat for fish & wildlife
- Doesn't rely on proposed dam raises or new offstream storage reservoirs
- Improves water quality by enforcing pollution limits

Thank you!
