Host: Annie Griffin

KNRY AM - 1240 THE VOICE OF THE CENTRAL COAST

Lester Snow
Ex. Director, CalFed...

Dear Mr. Snow, 9/3/99

Bravo for CalFeds attempt to restore the Sacramento - San Joaquin Delta and San Francisco Bay.

The CalFed draft plan must be strengthened to include a commitment to not build any new or expanded dam, reservoir or canal during stage 1 of the program and the following projects have been fully funded and used:

- Prevent pollution at its source:
Conservation of water (fines for excess water use, leaky faucets toilets ect) They fine us in Monterey for that during drought years).
- restore rivers, bays, wildlife habitat... everywhere where this is done only good has followed.

Agribusiness is notoriously wasteful and we, their tax paying slaves are fined while they go scott free. Its time they drip irrigated too!

As a taxpayer - show your agribusiness people this letter...

Thankyou,
Annie griffin
