Mr Snow

I am writing to voice my views about the current Legislation concerning California's water ways & the problems caused by misuse & excessive Dams & water storage. My concern is more strictly about the impact on water quality and how human intrusion on water resources affects the native wildlife as explained to me CALFED has potential if properly managed. However erection of new Dams & further storage is in effect, a backward step. Please carefully consider the original premise behind CALFED

And the impact that further
Dam's will create against
California Wildlife.
Please consider these things
when the time comes for
a decision, listen to
your heart, I am sure you
will do what is right.
I would be pleased to
hear from you regarding
this issue, and other
issues concerning California
wild life, waterway / conservation

Sincerely,

Scott D. Wilson
