8/21/99

Lester Snow
Executive Director, CALFED
1416 Ninth St.
Sacramento, CA 95814

Dear Mr. Snow:

Please consider this letter a response to the revised CALFED plan.

I would prefer CALFED to expand water efficiency, conservation, and reclamation programs to stretch our existing water supplies instead of building new dams and canals. This could be done by switching to higher value, less water consumptive crops, less wasteful livestock for consumption practices, and by installing water meters for all users.

I support CALFED's proposed restoration goals for the Central Valley including removing some facilities that act as barriers to migrating Salmon, increasing instream flows for fish, wildlife and recreation.

OBT 780(2)

The ecological problems caused by dams and diversions cannot be solved by building more dams and diversions.

Thanks for your time and consideration.

Sincerely,

Peter Catizone
