Leslie Snow
Executive Director, CALFED
1416 Ninth St
Sacramento, CA 95814

Dear Mr Snow —

It is my hope CALFED will be active & supportive of water efficiency, conservation & reclamation programs and look into alternatives other than building dams & diversions.

I believe some of CALFED's proposals to be good eg: the restoration goals for the Central Valley.

Its not possible to solve the ecological problem however by building more dams!

Thank you for your time & look forward to hearing where you stand on this issue.

Regards Lucy O'Flaherty
