Dear Mr. Snow

Please consider this a letter as a response to the Revised CALFED Plan.

I oppose Calfed's plan to increase surface water storage in the central valley by raising existing dams or building new offshore storage reservoirs.

I urge Calfed to expand water efficiency, conservation and reclamation programs to stretch our existing water supplies instead of building new dams and canals.

We cannot solve ecological problems caused by dams and diversions by building more of them. Thank you for your time. I look forward to hearing your position on this issue.
