SEP 13 1999

Dear Mr. Snow,

Please consider this a response to the revised CALFED Plan. I am writing this letter on the banks of the South Fork American River! The location adds to my appreciation of the complexity of these issues of CALFED. Our trip was late "waiting for water" from the upstream dam and we conclude our trip in the Folsom reservoir.

All part of California's very complex water supply, delivery, flood control, and irrigation system.

~~Please see that~~

The current EIS does not focus enough on habitat restoration,

environmental concerns and conservation methods. The current proposal focuses too much money, ~~too much~~ and too many resources on new storage facilites. 8LH(2)

Thank you for your time and consideration. I look forward to hearing your position on this issue.

Thank you,

Sarah Rose
