RE: Draft Phase II Report

Dear Mr. Saxe,

I am very concerned about the water situation in California. Please be more agressive about water conservation, especially with agricultural use. They use 80% of our water now!

Please don't build any more Canals. Too many have done more damage than good.

And, I'm am against

1023(2)

building a Peripheral Canal - in spades.

Thank you for letting me share my thoughts on this crucial problem.

Sincerely,

Jordan H. Hill
