Executive Director Snow,

CalFed Bay Delta program - to be successful - needs to NOT build any new or expanded Dams, OR canals.

Please have the plan include good extensive conservation program. Include prevention of pollution, groundwater systems, better/cleaner drinking water. Restore the Rivers + natural waterways. Restore fisheries.

This an opportunity to make changes to have a healthier waterways.

It is not politically desireable for some people It is the right way to do it. Such a huge and beneficial impact you can influence. Karen Jacobson
