CALFED BAY-DELTA PROGRAM

Public Comment

Date Sept 21, 99

The CALFED Bay-Delta Program welcomes your participation. Please use the space below for your written comments (attach additional sheets if necessary). SEE PAGE 2

Comments: I understand the water districts (plural) need to ask for more water. No. We can't continue to destroy. We have done it. Now we must stop sprawl in precious farm and open real rivers. Conservation can be done. Agriculture must and will if all of them are on the same footing. Green grass grows in Wisconsin where I'm from. PR will help the people accept desert plants in the desert. We are desert

Sept. 8, 1999

To the CUSTODIANS OF THE FUTURE,

Civilizations rise and fall on water problems. We cannot continue environmental destructions like SF Bay and food sources like Solmon.

No - dams, reservoirs, and canals.

I listened to all the heads of water districts begging - more water. SHORT SIGHTED.

Too late to do sprawl into river and farm. We must regulate conservation. Out of ballance users get an economic advantage that perpetuates over-use in the capitalistic system.

Examples: 1) Cotton takes too much water. Grow it where there is water. Too late to grow it in California and maintain living land.

2) Urban sprawl like

We can't take farms and natural rivers.

3) Lawns.

David E. Troy
